About Liqxtal

Liqxtal technology Inc. is a subsidiary of Himax Technologies Inc. Liqxtal has developed various liquid crystal optical components with exceptional LC optical design expertise including LC lenses for ophthalmic applications, LC diffusers for 3D sensing, and LC phase retarders for light sensing. Liqxtal focus on exploring novel technologies in vision eyewear technology and is dedicated to developing more stunning yet practical optical solutions.

Himax Technologies Inc. is a worldwide leading display imaging processing semiconductor solution provider. Himax's products include display driver ICs, micro display, image sensor, wafer level optics and intelligent sensors.
